

Caring for Your MICROFIBRE

To save the environment and reduce the use of detergents:

- Slightly dirty microfibre cloths can be washed with Norwex Washing-Up Liquid under warm running water and used again before laundering.* Rinse thoroughly after washing and hang to dry or drop into the dryer. For best cleaning results, Norwex Microfibre should be machine-dried after laundering.
- Launder microfibre cloths with other lint-free laundry and dry completely.
- Use Norwex Ultra Power Plus without fillers and bleach for best results.
- Between launderings, use our Rubber Brush to remove dirt from Norwex Mop Pads and Dusting Mitt.
- Do not use bleach, fabric softener or dryer sheets when laundering microfibre as these additives coat the surface of the fibres and reduce the microfibre's ability to clean effectively.

- Do not use microfibre (except Optic Scarf) on anti-glare surfaces.

* Note: Cloths that have been utilised for heavy cleaning should be laundered after each use.

All Norwex Microfibre products carry a two-year warranty.
Please visit www.norwex.com for complete details.

Getting the Most from Your Microfibre

It's Flat Out Clean: For a more effective clean, fold your Norwex Microfibre in half and then in half again and spread your whole hand over the flat cloth, wiping with even strokes. This ensures that more of the fibres are in contact with the surface and pick up the maximum amount of dirt, grime and debris.

Norwex® Microfibre Cleans Everything *without chemicals or kitchen roll waste*

Norwex Microfibre has the ability to remove up to 99% of bacteria from a surface when following the proper use and care instructions.

New and Improved EnviroCloth™

The best just got better!

Maximise your "green" cleaning power

Superior quality microfibre combines with our unique knitting process to create our EnviroCloth™, a multipurpose cloth that can be used wet or dry to clean everything with outstanding results.

- Eliminates costly cleaning chemicals
- Made with fibre that has a maximum length of more than 10 million feet or over 3 million metres for more effective cleaning power
- Now 14% thicker and more absorbent to pick up and hold more dust, dirt and debris
- Holds up to 7 times its weight in water

A Clean You Feel Good About

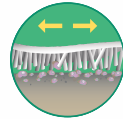

Many of our Norwex Microfibre products contain BacLock®, an antibacterial agent for self-cleansing purposes only. The agent is solely designed to inhibit bacterial odour, mould and/or mildew growth within the product.

BacLock®

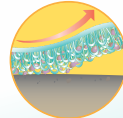

*Registered in Patent and Trademark Office

How Norwex Microfibre Works vs. Cotton

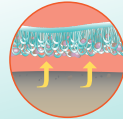

Traditional cotton cloth pushes around particles, spreading dirt, grime and moisture into the surface crevices, leaving it moist and unclean.

Norwex Microfibre lifts and collects particles. Used dry, Norwex Microfibres produce an electrostatic charge that attracts even the smallest particles of dirt, grease and moisture, leaving the surface free from everything.

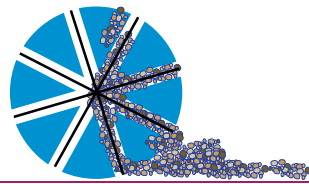

Norwex Microfibre self-purifies. Used wet, the micro silver in the cloth goes to work with self-purification properties.

THE DIRT IS IN THE DETAILS

At 1/200th the size of a human hair, Norwex Microfibre is uniquely structured in the shape of a star, allowing it to lock in dust, dirt and grime between its crevices.

Norwex Microfibre leaves surfaces clean, spotless and polished with no chemical residue left behind.

The Norwex Difference

Our Global Mission is to improve quality of life by radically reducing chemicals in our homes. In support of our Mission, Norwex was one of the first companies to offer microfibre as a highly effective and healthy cleaning solution.

It's Effective

- May remove up to 99% of bacteria from the surface when used with proper use and care instructions.
- Decrease cleaning time by up to 75%.
- Reduce the use of cleaning products and supplies by up to 90%.

It's Healthy

- Reduce exposure to toxic fumes and harmful chemicals from cleaners.
- Cleaner indoor environments reduce allergies.

It's Green

- Reduce kitchen roll use and lessen contributions to landfills.
- Decrease air and water pollution from harmful chemical cleaners.
- Preserve the environment for future generations.

MORE Microfibre Must-Haves

These top-rated products are essential for reducing chemicals and creating a Safe Haven in your home. All products below contain BacLock®.

Window Cloth

For sparkling windows, mirrors and jewellery and smooth, shiny surfaces.
